# Anesu Muusha

## Senior QA tester

54 Lourens Street, 7110 Cape Town, +27719270935 anesumuusha@gmail.com

---

## Professional summary

Results-driven Senior QA professional with 4 years of experience in quality assurance, user support, and software development. Proven expertise in manual and automated testing, defect management, and delivering high-quality software in Agile environments. I have a strong technical foundation from prior Software Developer roles, combined with an IT Diploma and ISTQB certification, which enables deep collaboration with development teams, effective root-cause analysis, and robust test automation. I am actively adopting generative AI and AI-powered testing tools to accelerate test case generation, enhance automation resilience, and improve overall testing efficiency. Passionate about improving product reliability and user experience. Seeking a Senior QA role to drive quality initiatives and mentor teams.

---

## Work experience

### Senior QA and user support, Nov 2024 – Present

#### ECDCConnect – Cape Town, South Africa

- Designed, executed, and maintained comprehensive manual and automated tests (regression, UAT, staging, and production) to ensure high platform quality and stability.
- Built and implemented a reusable test automation framework that significantly reduced regression testing time and maintenance effort.
- Automated test data creation processes, cutting manual setup time by 50% and enabling faster testing across environments.
- Developed and managed user support automations, including chatbots, response templates, and automated workflows, substantially reducing support ticket volume while improving response efficiency.
- Collaborated closely with the development team on defect triage, root-cause analysis, troubleshooting, and verification of fixes to minimise post-release issues.
- Created and maintained detailed test plans, bug reports, and traceability matrices in Jira and Google Sheets.
- Supervised and mentored a Junior User Support & QA Agent, ensuring consistent quality standards and knowledge transfer in testing and support processes.
- Led end-to-end quality assurance processes and provided expert user support, resulting in a 30% reduction in defect rates and a 25% increase in user satisfaction through timely issue resolution and process optimization.
- Led comprehensive quality assurance processes and provided expert user support to enhance system reliability and optimize client satisfaction at ECDCConnect.

### Software developer, Aug 2022 – Oct 2024

#### Peruzal – Cape Town South Africa

- As a learner, I was responsible for writing clean and efficient code, testing, debugging, and deploying it to production.
- To coordinate work, we used Trello boards and shared updates, discussed issues, and set priorities.
- I also attended daily stand-up meetings where I shared my progress and any blockers I encountered.
- Project collaborated on: <https://github.com/Peruzal/guides>
- Developed and optimized scalable software solutions using JS and React, resulting in a 30% increase in application performance and enhanced user experience at Peruzal.

## Education

Jan 2019 - Dec 2021 Diploma , Zimbabwe

Jan 2018 - Nov 2018 National Certificate , Zimbabwe

---

## Skills

Test Case Design

Agile Methodologies

Functional Testing & Regression Testing

Test Case Design & Test Planning

UI Testing & Validation

Writing & Maintaining Automated Test Scripts

JavaScript / TypeScript

DOM Manipulation & Debugging

JSON Handling

Incident Management

End-to-End (E2E) Testing using Playwright

Smoke & Sanity Testing

Cross-browser Testing

Test Automation Framework Development

CI/CD Integration for Automated Tests

Frontend Development with React

API Testing (REST APIs)

User Support: Bots and Automations
